We exist as part of our community’s healthcare system providing knowledge, reassurance and support focused on honoring people’s wishes as they approach an unknown part of life.

Medicare surveys show that that 95% of our patients’ family and friends would recommend our services to others. That is 11% higher than the national average and the highest of any hospice in our service area.

"I admitted a woman into hospice care whose daughters had not been able to visit her. I got their permission to use a telehealth application so they could see and talk with their mother while I was there. The woman was bed-bound, so the only way I could make sure her children and she could see each other was to recline in the bed next to her and hold my smartphone at the best angle. They were able to see each other and share words of love and acceptance. It was quite moving for all of us."

- Lisa Howard, BSN, RN, CHPN, Director of Nursing

We are your hometown hospice, Neighbors Helping Neighbors, since 1984.
