

## Overview

Hospice Governance Academy® is an on-line learning platform for hospice boards that allows you to bring everyone to the same level of understanding on the topics of your choice, while maximizing your face-to-face meetings to go deeper or broader on these subjects.

Integriti3D® assists Chief Executives and Boards of Directors of hospice and palliative care organizations to face the future with confidence. Let us help you tap the full potential of the board via board self-assessments and strategic planning while leveraging the power of HGA.

"I have thoroughly enjoyed the Hospice Governance Academy courses. The speakers are knowledgeable and dynamic, and even subjects which didn't immediately thrill me, turned out to be interesting, important, and actionable. These have really been high points; I have learned a lot. Bill personally adds enormously to the process. He is clearly good at working with groups and synthesizing ideas, and he brings broad knowledge and experience to the process."

Dr. Kenneth Riff, Board Member – North Hawaii Hospice

*"As a board chair, I would highly recommend working with Bill and Hospice Governance Academy. The HGA Spotlight Interviews cover a wide range of important subject matters for boards overseeing hospice organizations, which tend to be relatively complex entities."*  
Susan Hunt, Hospice Board Chair

"In all of my years volunteering on boards, and there have been several, this is the first time that I have received such an in-depth understanding right from the get-go. The HGA training has made me energized and prepared to serve!"

Jim Preston, Emmanuel Hospice Board of Directors
