

## National HME Overview

National HME is a National Direct-Service Hospice DME Provider that was founded in 2006. We proudly have 55+ owned and operated locations and 330+ employees nationwide. Our mission is to provide the best care coordination, medical equipment, and services to maintain a high quality of life by enabling patients to live as comfortably and as pain-free as possible. National HME's "Family Standard" demonstrates our dedication and commitment to patient care, honoring the families we are serving with high standards of equipment and services, and ensures each client is served and treated as if they are a member of our own family. Hospice Cloud Pro "HCP" (our proprietary Hospice Client Management "HCM Technology") was designed specifically with healthcare providers in mind- to help coordinate and provide the best patient care and experience possible. Hospice Cloud Pro allows you to create new patients, place orders, track deliveries real-time, receive text message updates, review reporting, executive dashboard reporting, and so much more! These HCP solutions are available at your fingertips on your phone, tablet, or computer! We would love to have the opportunity to meet with you and give you a demo of HCP. National HME is more than a DME Provider, we aim to be YOUR PARTNER IN QUALITY CARE.
