

SPEECH RECOGNITION SOLUTIONS

nVoq Overview

nVoq Incorporated provides a HIPAA and PCI-DSS compliant, cloud-based speech recognition platform supporting a wide variety of healthcare delivery scenarios including post-acute care with an emphasis on home healthcare and hospice. nVoq's speech recognition solutions convert speech to text in seconds and are highly accurate for most medical specialties.

nVoq's speech recognition solutions work seamlessly with most EHRs, CRMs, or business applications without the need for integration. Or, add the power of voice to your development platform through easy-to-use application programming interfaces (APIs). Both services are offered with flexible subscription pricing.
