

Hospi Corporation Overview

Hospi Corporation's flagship product is the Macy Catheter– an FDA-cleared rectal medication and fluid administration device that facilitates quick, effective symptom management. Unconventional? Yes. Does it work? Absolutely.

Because the Macy Catheter allows hospice nurses to get patients comfortable in minutes using medications already at the bedside, Hospi helps agencies 1. mitigate staffing challenges, 2. reduce costs, 3. improve quality scores, and 4. increase referrals.

To learn more how the Macy Catheter could impact your agency, visit www.MacyCatheter.com.
