

Concergix Overview

Concergix is a full-service, concierge Hospice DME Solutions company that was founded on the vision that mission-driven, community-based hospices deserve a DME partner—and not a vendor. This foundational principle fuels our mission: Design a cost-effective solution, be Dynamic, and Deliver the highest quality DME services. Concergix is hyper-focused on hospice and palliative care, delivering products and services that allow our hospice partners to provide quality care with exceptional service and manageable costs. This specialized focus allows us to provide customized solutions that go beyond traditional DME services, including Remote Patient Monitoring, Chronic Care Management, and Remote Therapeutic Monitoring.
