

## Seniors Home Services Overview

Seniors Home Services was founded with one principle in mind: to help seniors remain comfortably and safely in their homes, as healthy as possible, for as long as possible. While we offer a number of services for seniors, many covered by CMS, for palliative care our most advantageous courses are our 90-Day, in-home, remote pulmonary and cardiac recovery programs that have shown a combined 30-day hospital readmission rate of 5.2% vs a national average of 30.5%. All equipment is supplied, and live online group classes are conducted three times a week with instructors who educate, instruct, encourage and praise the participants. ([www.RemoteCareToday.com/hospice/shs](http://www.RemoteCareToday.com/hospice/shs)). We strongly encourage you to visit this webpage to see videos of actual recovery classes and the testimonials of real patients.

The company also provides a complete range of virtual care services, plus CereSkills, a unique program with 23 years of efficacy shown to help protect and recover a person's balance, mobility, memory and cognition.
